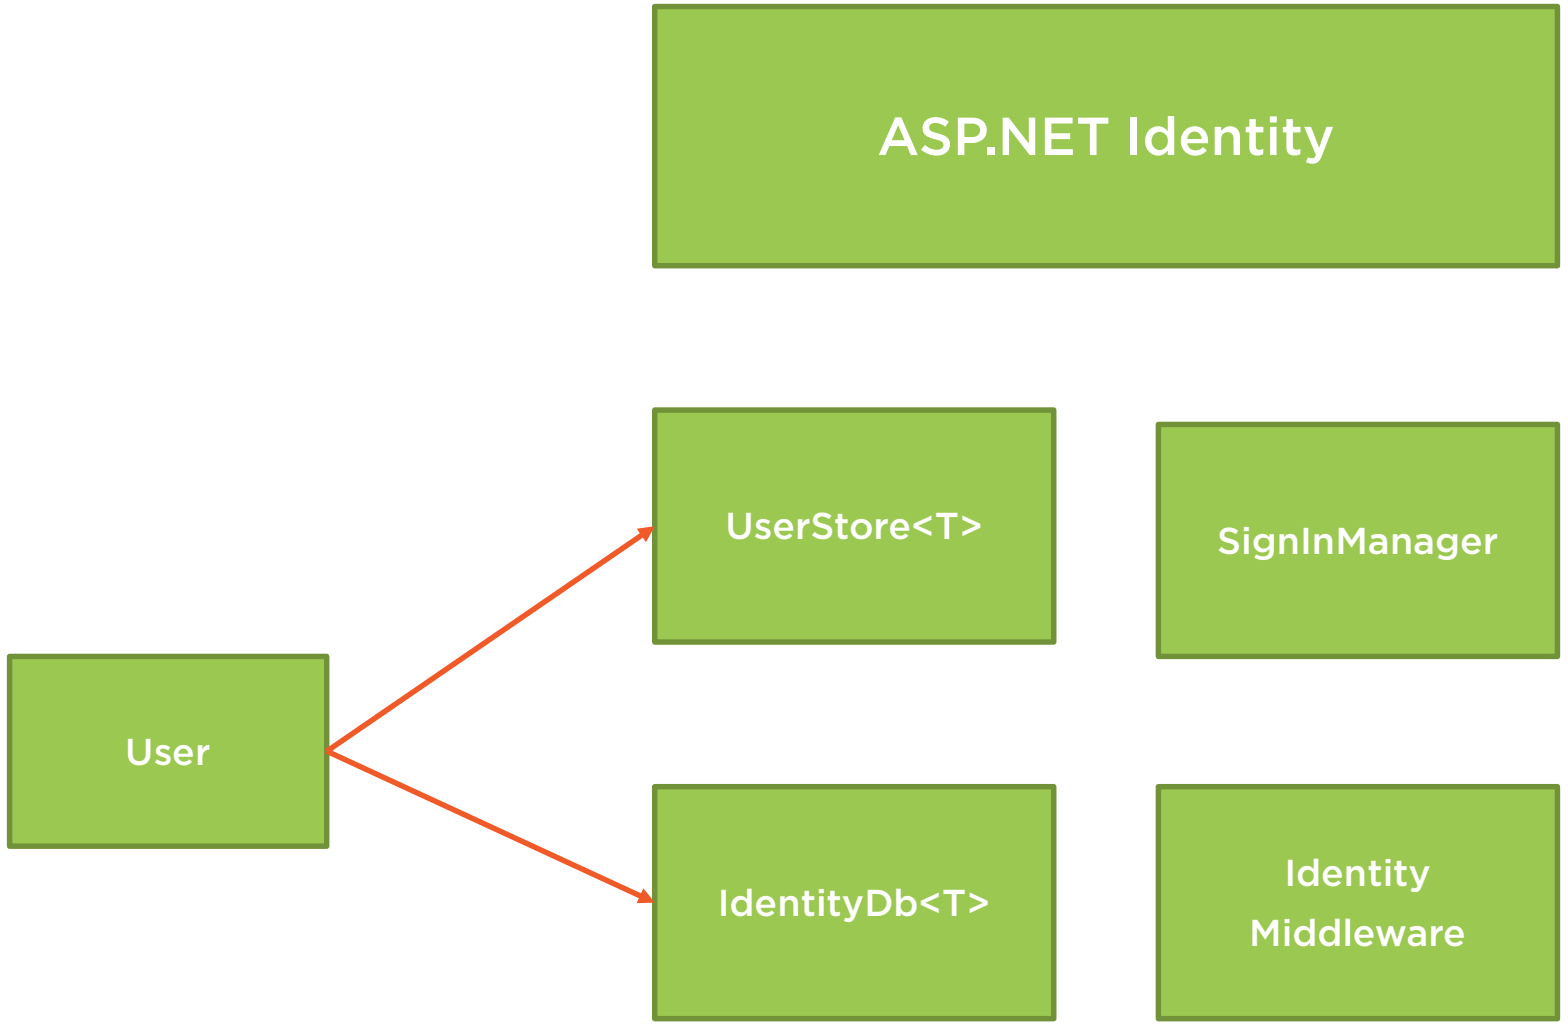
Identity Overview



Authorize and AllowAnonymous

```
[Authorize]
public class ProtectedController : Controller
{
    // ....
}
```

```
[Authorize]
public class ProtectedController : Controller
{
    [AllowAnonymous]
    public IActionResult UnprotectedAction()
    {
        return Content("Hi!");
    }

    // ... All other actions require sign-in
}
```
